Edmonds Driftwood Players

OUR ENHANCED AIR FILTRATION SYSTEM

Among the many improvements we have undertaken, this theatre is now equipped with a proprietary air purification system that uses light waves and a catalytic process to produce scrubber ions that pass through the building's systems, effectively killing bacteria and viruses.

This NASA approved ActivePure[®] technology is the only one proven to reduce over 99.9% of the virus that causes COVID-19 on both surfaces and in the air.
